Covid Vaccines, Still not Efficient

COVID-19 vaccines comparision

The US exhibits vaccinated population percentage almost 11 times that of Republic of Congo.

However, the ratio of deaths to the confirmed cases remains proximate for both the countries.

79.3%

263,279,200

People vaccinated with at least 1 dose in the USA
Out of 332 million

7.15%

6,577,469

People vaccinated with at least 1 dose in Democratic Republic of the Congo
Out of 92 million

1.10%

Deaths w.r.t. to infections

1,062,721
96,474,411
USA

1.54%

Deaths w.r.t. to infections

1,445
93,258
Democratic Republic of Congo
